AMENDMENT TO THE SPECIFICATION

Please make the following amendment to the specification to correct a minor typographical error. No new matter has been added.

Replace the paragraph beginning at page 8, lines 10-17 with the following replacement paragraph:

The upper window is a camera viewer where an image transmitted by the camera server 102 is displayed. Further, it is possible to designate the direction, panning and tiling tilting of the camera by operating scroll bars arranged on the right and bottom of the transmitted image. A camera viewer of this type is explained in detail in Japanese Patent Application Laid Open No 10-42279.
